¹After subtraction for the CDQ reserve (10 percent) and the ICA (3.5 percent), the pollock TAC is allocated as a DFA: inshore component - 50 percent, catcher/processor component - 40 percent, and mothership component - 10 percent. Under § 679.20(a)(5)(i)(A), the CDQ reserve for pollock is 10 percent. The A season, January 20 - June 10, is allocated 40 percent of the DFA and the B season, June 10 - November 1, is allocated 60 percent of the DFA.

²No more than 28 percent of each sector's annual DFA may be taken from the SCA before April 1. The remaining 12 percent of the annual DFA allocated to the A season may be taken outside of SCA before April 1 or inside the SCA after April 1. If 28 percent of the annual DFA is not taken inside the SCA before April 1, the remainder is available to be taken inside the SCA after April 1.

³The pollock ICA for the BS subarea is 3.5 percent of the TAC after subtraction of the CDQ reserve.

⁴Under § 679.20(a)(5)(i)(A)(4)(i) and (ii), NMFS will allocate 91.5 percent of the catcher/processor sector allocation to AFA catcher/processes engaged in directed fishing for pollock and 8.5 percent of the catcher/processor sector allocation to AFA catcher vessels delivering to catcher/processes unless changed by the cooperative contracts.

⁵Under § 679.20(a)(5)(i)(A)(4)(iii), unlisted AFA catcher/processes are limited to harvesting not more than 0.5 percent of the catcher/processor sector allocation of pollock.

⁶Under § 679.20(a)(5)(i)(A)(6), NMFS establishes an excessive harvesting share limit equal to 17.5 percent of the sum of the directed fishing allowances established under paragraphs (a)(5)(i) and (a)(5)(ii) of this section.

⁷The Aleutian Islands subarea and the Bogoslof District are closed to directed fishing for pollock. The amounts specified are for incidental catch amounts only, and are not apportioned by season or sector.
